Session 1 Presentation

for Tales of Defiance to Mind Control in the Modern Age

Scott Axelrod

Contents

Course Overview: 1

Stories in a Dystopian Arc 2

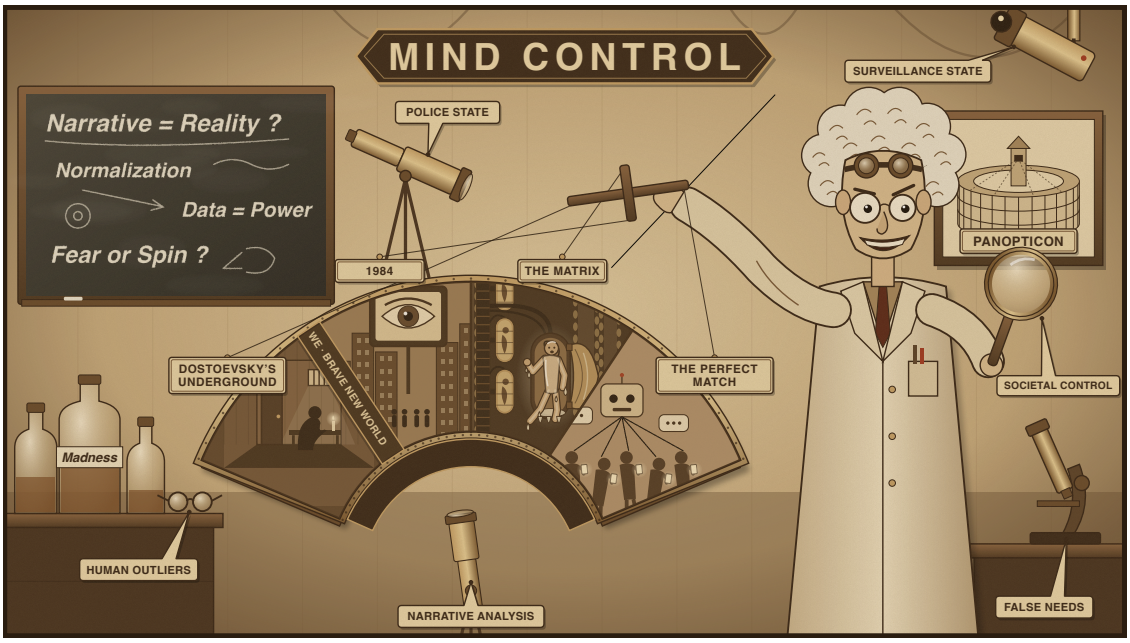
Some Lenses 3

Mad Scientist with Lenses on Dystopian Arc 4

Course Parody: 5

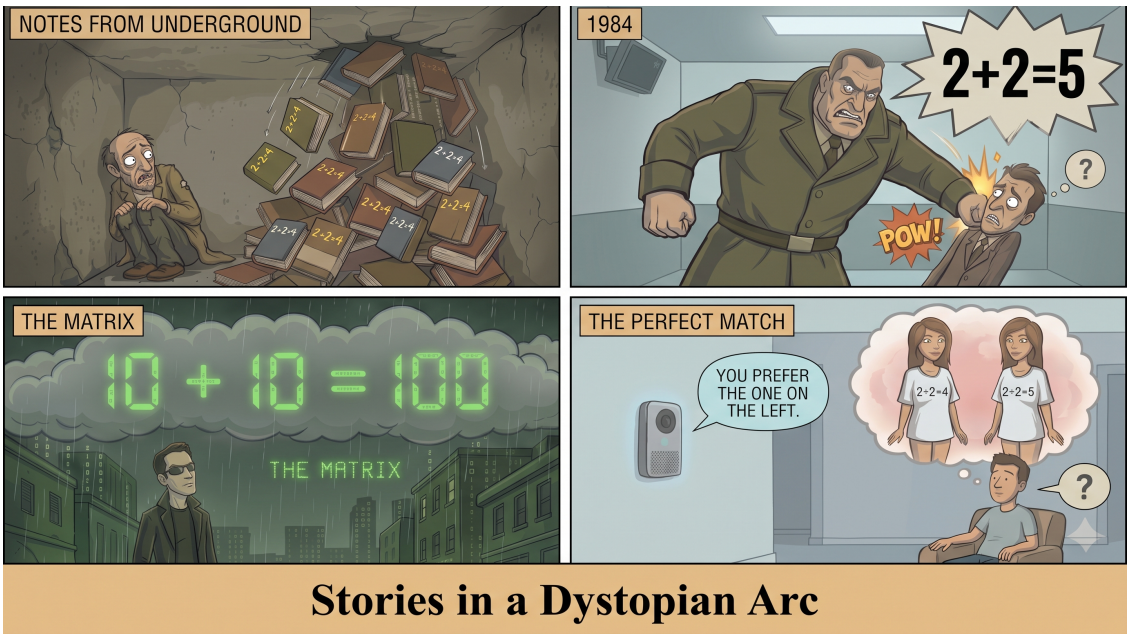
Course Goals: 6

Course Overview:



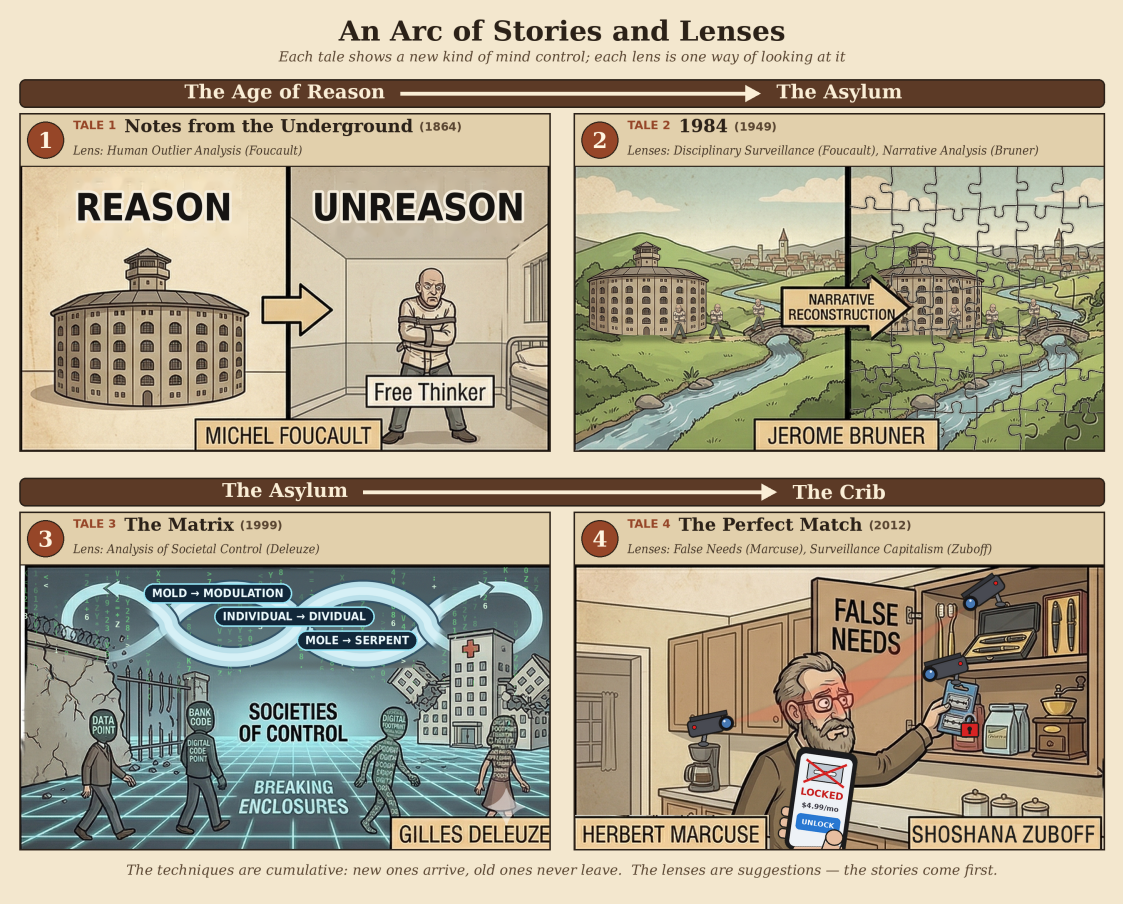
- Look at modern age stories where societies impose/offer mind control.
- Consider characters who are rebelling.
- Ask questions through various lenses.

Stories in a Dystopian Arc



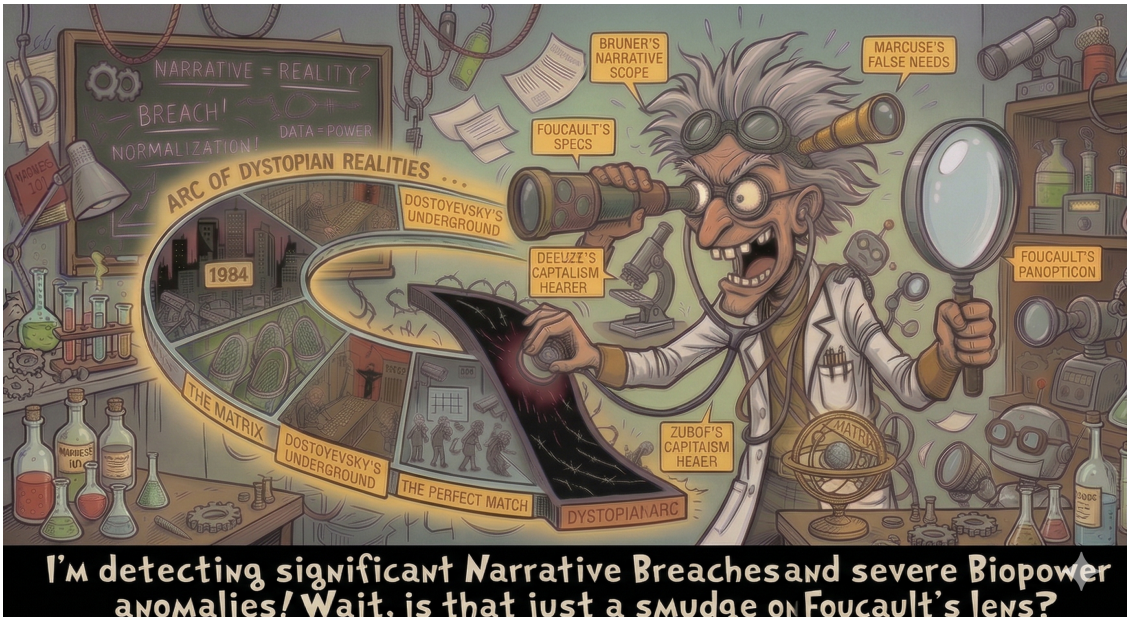
- Dostoyevsky's Underground Man, isolated and being crushed by 2+2=4 reason .
- Winston from "1984" being pounded by Big Brother to truly believe 2+2=5.
- Neo from "The Matrix" perceiving that his entire world is a computer simulation, seeing the simulation of 2+2=4 in binary.
- Sai from "The Perfect Match" being nudged by the AI agent Tilly to tell him that he prefers the beautiful girl in the "2+2=4" T-shirt.

Some Lenses



- **Human Outlier Analysis** (Michel Foucault):
  - Madness and Confinement
  - Knowledge and Limits of Thought
  - Panopticism and Disciplinary surveillance
- **Narrative Analysis** (Jerome Bruner):
- **Societal Control** (Gilles Deluze):
  - Foucault's "enclosures" (prisons, schools, hospitals) are breaking down.
  - We are no longer "individuals" in a room; we are "dividuals"—data points, bank codes, and digital footprints that are tracked in an open, continuous loop of control.
  - It's not about being locked in a cage; it's about being part of a network where the "control" is fluid and constant.
- **False Needs** (Herbert Marcuse)
- **Surveillance Capitalism** (Soshanna Zuboff:)

Mad Scientist with Lenses on Dystopian Arc

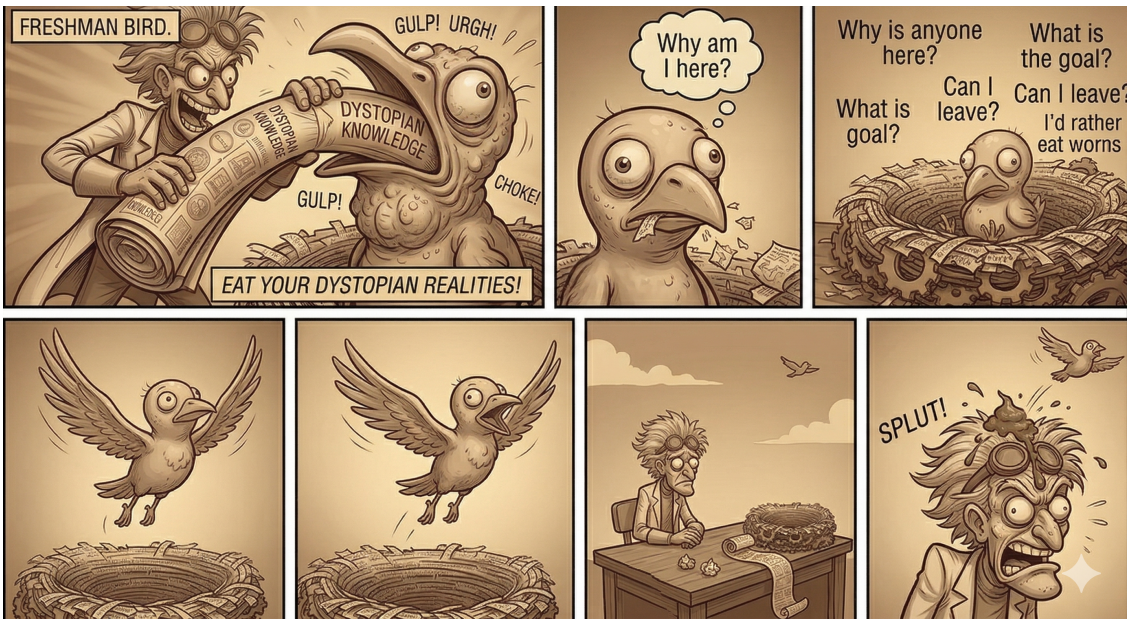


- This is original version of Course Overview picture above.

Course Parody:

- I can get pretty excited by my own stuff.
- Watch out that I don't force a point of view on you.

Course Goals:



- You should ask questions.
- Thought-opening not thought-limiting.
- So you can fly away in your own individual way.
- Even if it means rejecting my framing.
